

Data Flow Diagram

Date	1 July 2026
Team ID	
Project Name	Human Development Index (HDI) Predictor – A Comprehensive Measure of Well-Being
Maximum Marks	2 Marks

Data Flow Diagram

Create a Data Flow Diagram (DFD) to show how data moves through your system - between external entities, processes, and data stores. Use the symbol legend below as a guide.

DFD Symbol Legend

Symbol	Name	Description
Oval / Rounded shape	External Entity	Represents the User / Researcher / Policymaker who enters Life Expectancy, Education, and GNI values and receives the predicted HDI category.
Rectangle with numbered header	Process	Represents the main processing steps: 1. Input Validation , 2. HDI Prediction Engine , and 3. Display Prediction , which validate inputs, predict the HDI category, and display the result.
Rectangle (solid fill, no number)	Data Store	Stores data required by the system such as HDI Dataset (HDI.csv) , Trained Model (hdi_model.pkl) , and Validated Input Data used during prediction.
Labeled arrow	Data Flow	Shows the movement of information between the user, processes, and data stores, including Input Indicators , Validated Data , Prediction Result , Model Loading , and Predicted HDI Category .

Example

The diagram below illustrates how the symbols above come together to form a complete data flow diagram.
