Communication Challenges & Resolutions:

S.No	Challenge Faced	Resolution / Action Taken
1	Dependency installation and environment setup issues.	Resolved by creating a virtual environment, installing required packages, and updating the <code>requirements.txt</code> file.
2	Deployment configuration and hosting issues.	Successfully deployed the Flask application on Railway and verified public access through the generated URL.
3	Version control and repository synchronization issues.	Managed the project using GitHub, committed all source code, and synchronized updates through Git commands.
