

Project Executable Files

Date	7 JULY 2026
Team ID	
Project Name	Human Development Index (HDI) Predictor – A Comprehensive Measure of Well-Being
Maximum Marks	3 Marks

Project Executable Files

This section requires submission of all executable and deployable files for your project. Ensure all files are properly organized, named, and uploaded to the specified submission platform. The evaluator must be able to run or deploy your solution using the provided files and instructions.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (all files and folders)	Yes
2	README / Setup Guide (instructions to run the project)	Yes
3	requirements.txt / package.json / dependency file	Yes
4	Database schema / seed files (if applicable)	Yes
5	Environment configuration file (.env.example or similar)	No
6	Deployed application URL (if hosted)	Yes
7	APK / Executable binary (if applicable for mobile/desktop apps)	NA
8	Dockerfile / Containerization config (if applicable)	No (or NA if not used)
9	Test files and test results	No
10	Demo video or walkthrough (if required)	Yes

Step 2: File / Folder Structure

Provide an overview of your project's file and folder structure below:

HDI_Predictor/

```
|
|
|— app.py
|— config.py
|— model_utils.py
|— db_utils.py
|— train_model.py
|— seed_history.py
|— requirements.txt
|— model.pkl
|— model_meta.json
|— predictions.db
|— country_data.json
|— Human Development Index - Full.csv
|
|— templates/
|   |— index.html
|   |— history.html
|   └— about.html
|
|— static/
|   |— style.css
|   |— graphs/
|   └— images/
|
└— README.md
```

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	https://web-production-83e29.up.railway.app
Login Credentials (Demo)	Not Required
Platform / Hosting Provider	Railway
Repository Link	https://github.com/AP24110010600/Human-Development-Index-HDI-Predictor-A-Comprehensive-Measure-of-Well-Being
Demo Video Link	https://drive.google.com/file/d/1O6THs2MJdsaIH5mk0HUauh1e5ABpA38e/view?usp=drive_link

Step 4: Run Instructions

Provide clear, step-by-step instructions for the evaluator to run your project locally:

1. Clone the repository.
2. Open the project folder in VS Code.
3. Create a virtual environment.
4. Install the required packages:

</> Bash

```
pip install -r requirements.txt
```

5. Start the Flask application:

</> Bash

```
python app.py
```

6. Open the browser and visit:

```
http://127.0.0.1:5000
```

7. Enter the country details and click Predict HDI.

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	Prediction accuracy depends on input data quality.	Use valid and realistic country indicators.
2	Requires an internet connection for the deployed Railway version.	Run locally using Flask if offline.
3	Supports HDI prediction only; it does not provide policy recommendations.	Future enhancement.
